ELECTROPHORESIS

Special Issue – 2018 Annual Meeting of the AES Electrophoresis Society at Scix

We are pleased to announce a special opportunity for authors presenting their research at the 2018 Annual Meeting of the AES Electrophoresis Society at Scix, to be held October 21 - 24, 2018 at the Atlanta Marriot Marquis, Atlanta GA.

AES has teamed up again with the journal **ELECTROPHORESIS** to publish a special proceedings issue highlighting selected manuscripts associated with work presented at the AES Topical Sessions at Scix. All types of manuscripts are accepted: review articles, research articles and short communications.

Benefits of contributing your work to this special section include enhanced visibility and rapid turnaround time. To ensure timely communication of these proceedings, we will follow an accelerated timeline, with a **deadline set for November 15, 2018** for manuscript submission with a tentative publication date in May 2019.

Please submit your manuscripts electronically at: <http://mc.manuscriptcentral.com/elpho> indicating that it is intended for this special proceedings issue, or contact one of the co-editors directly. The co-editors for this special section in **ELECTROPHORESIS** are and Blanca H. Lapizco-Encinas (bh1bme@rit.edu) and Alexandra Ros (alexandra.ros@asu.edu).

Thank you again for your valuable contribution to the 2018 AES Annual Meeting at Scix and to this special Issue of the journal **ELECTROPHORESIS**.

Sincerely,

AES, Electrophoresis Society
